

REFLEX REELS and CANS

For over 40 years film makers have learned to depend on GB reels. Precision constructed of special tempered steel carrying the famous teardrop design. Both reels and cans fully painted — inside and out for best protection. 16mm sized cans all have hemmed edges to prevent cutting.

Gentlemen:

Thank you for the interest shown in our products as advertised in THE INDUSTRIAL PHOTOGRAPHY MAGAZINE.

Our reels are made from a very hard steel that resists bending, which makes for a very sturdy construction and a flexible reel protecting your valuable film. The reel is painted completely inside as well as the outside, to prevent rust. The painting of the reel completely inside before assembly can only be done by a riveted constructed reel and not by a welded reel. Rivets are flush with the blades.

G oldberg reels and cans have been used as a standard in the film industry for over forty years.

Enclosed is a catalog sheet showing all sizes of reels, cans and fiber cases that we manufacture.

We are very sorry that we cannot sell or quote direct, but may we refer you to our distributor in your territory,

COMPREHENSIVE SERVICE CORPORATION

250 WEST 64th STREET

NEW YORK 19, NEW YORK

who carry a very large and complete stock of all of our products and usually can make immediate shipment. We do trust we will be of service to you through our distributors.

Very truly yours,

GOLDBERG BROTHERS, INC.

Morris Goldberg
